

Continuous Ink Jet | Thermal Ink Jet | Drop on Demand | Hi-Res

Established in 1993, CMS has specialised in industrial inkjet inks and associated consumables since its creation. This makes us one of most experienced manufacturers on the market today. We make inks for all the current inkjet technologies Continuous Ink Jet, Drop On Demand, Thermal Ink Jet and Piezo.

We manufacture a full range of 100% compatible inks for use with the majority of printers on the market today. We offer competitive prices without any compromise in quality. In addition to our compatible inks we can make custom formulations and already supply a number of printer manufacturers.

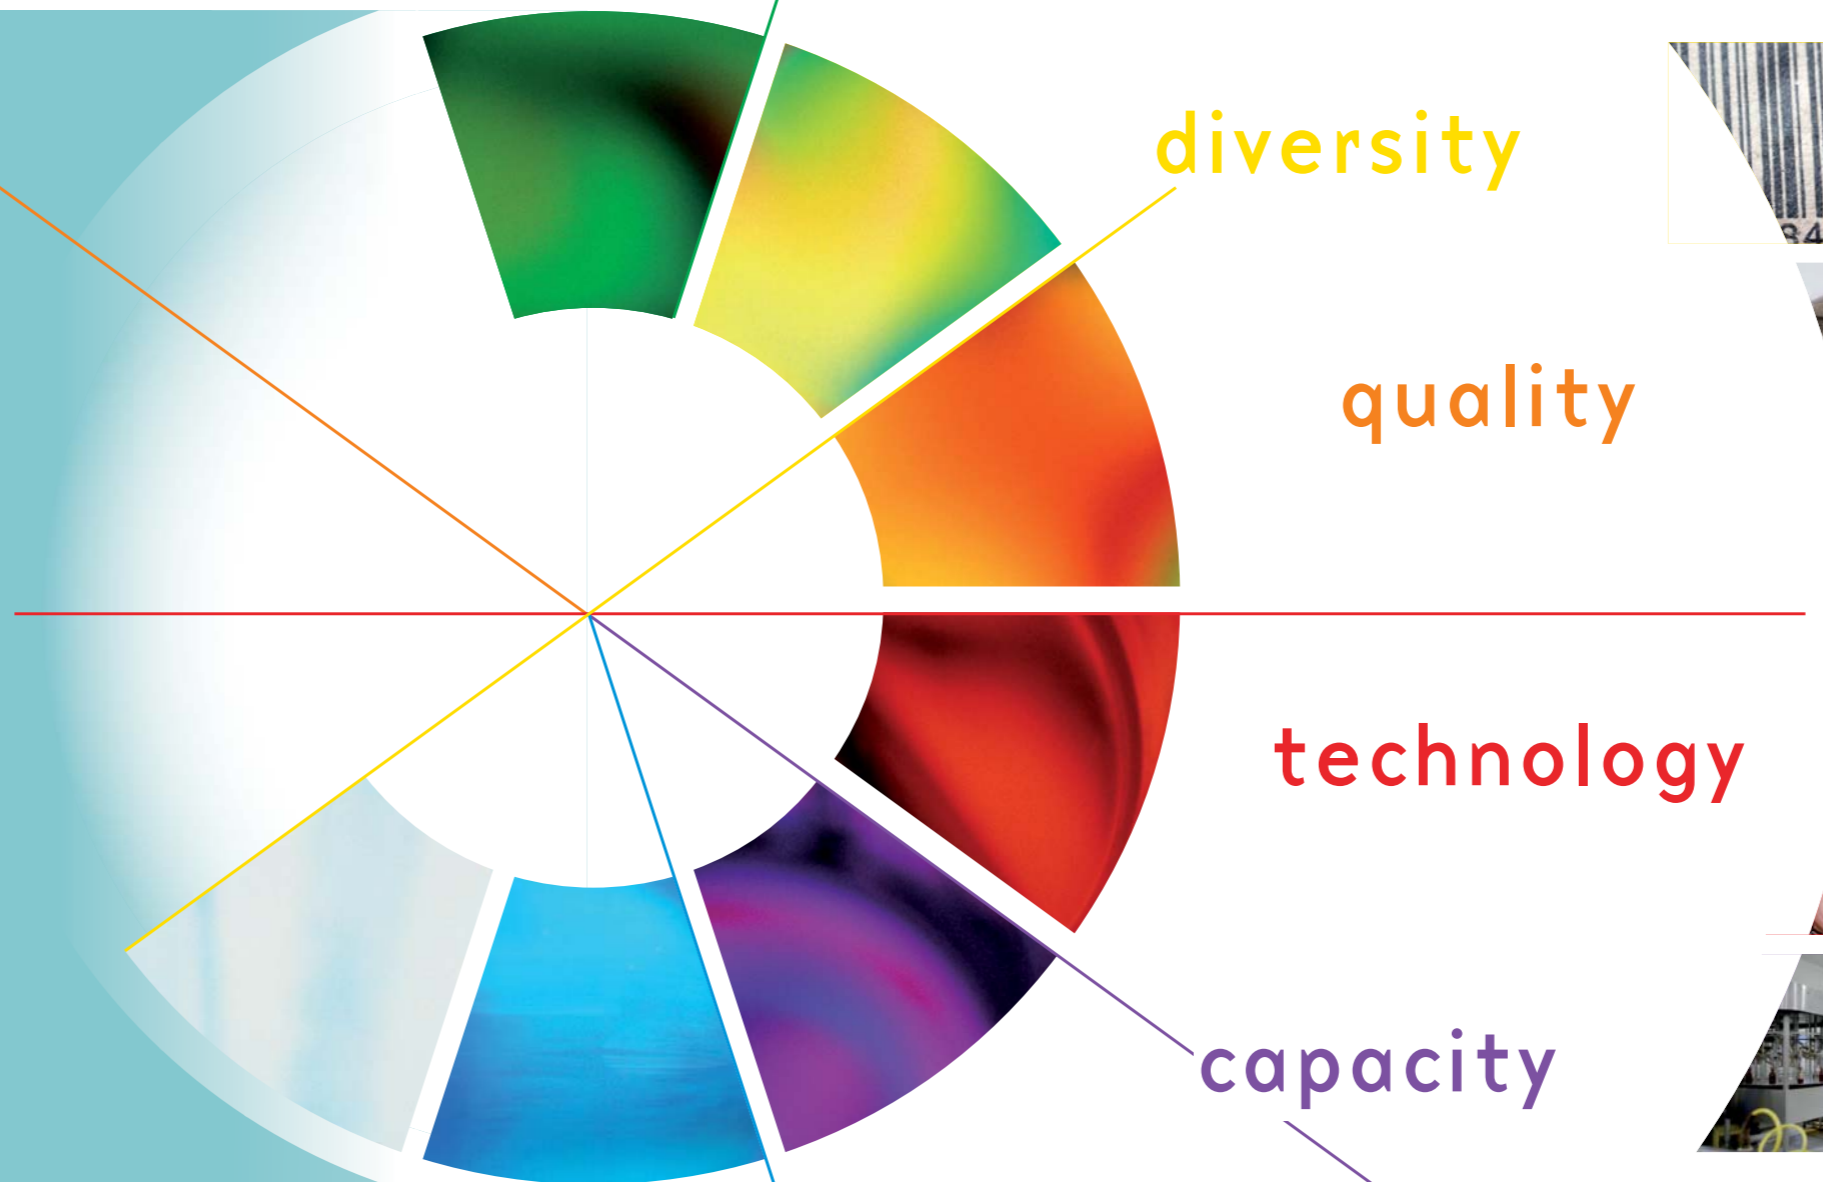

- Here are some of the types of inks already made by us :
- General purpose dye base ink in various colours and solvent bases.
  - HAP and halogen free inks.
  - Soft pigmented ink.
  - Pigmented inks.
  - Food Grade inks.
  - Alkali washable or wet process inks.
  - Low offset or anti migration inks.
  - UV readable ink.
  - High resolution inks, including oil, solvent base and UV curable.
  - Solid or wax inks.

As well as these inks we also manufacture all the associate make-ups, wash solutions and solvents used with these inks.

CMS has three manufacturing sites, one in France the others in the UK and Argentina. We have a large distribution network with a presence in over 50 countries in all the continents on the globe. As well as distributing our own range of products we also distribute custom manufactured products direct to equipment manufacturers own distributors. We ship throughout the world and can generate all required export documents. We pack all goods in-house for road, sea or air freight.

- As part of our distributor support program, we can also supply spare parts. We are able to source most parts for the majority of printers. These include :
- Filters
  - Valves
  - Diaphragms
  - Nozzles
  - Sensors
  - Power Supplies
  - Control Boards

Our R & D team produces all our formulations and can create custom inks on demand or modify existing inks to meet specific requirements. We also can custom label products to your specific needs. We have our own laboratory and test facilities. All raw materials used are from well know major suppliers. All our products are fully tested to assure the highest quality and reliability.

diversity
